

FeNO and Airway Inflammation in Asthma Masterclass

With Karen Frankland, Lead Nurse for Education and Clinical Support

The FeNO masterclass has been developed to support a range of health care providers who are performing and interpreting FeNO for the diagnosis and management of patients with asthma. It is suitable for those who are new to FeNO testing or as a refresher to update current knowledge.

The training includes an overview of type 2 inflammatory airways disease, measurement of nitric oxide and interpretation of results. There will be case study discussion and an overview of the recommendations for FeNO testing in NICE/BTS/SIGN asthma guidelines, 2024. (NG245)

There will be an opportunity to complete a short online survey following the training and a certificate of attendance will be provided

About Karen Frankland

Karen is a primary care respiratory nurse specialist and qualified teacher with over 30 years' experience within the NHS, occupational health, the pharmaceutical industry and education. She has a keen interest in modern asthma diagnostics, particularly the effective use of FeNO testing.
